**MagnaFlush II**

Precision tuned system designed to deliver maximum performance.

**Extra-Large Three-Inch Flush Valve**

Offering more than twice the potential flushing volume as a standard two-inch flush valve, the Maverick's extra-large three-inch flush valve offers a quick and powerful flush. For demanding applications -- choose Mansfield®.

The Extra-Large Three-Inch Flush Valve compared to a standard two-inch flush valve.

**Extreme Trapway Design**

The heart of the Maverick is a wide 2-1/8" glazed trapway. Designed with a unique "double trap" to create more vacuum and a stronger siphon action resulting in an extremely powerful flush. MagnaFlush II virtually eliminates clogging.

**Powerful Direct Feed Jet**

A powerful Direct Feed Siphon jet provides maximum performance for the MagnaFlush II system. Fast water delivery combined with increased head pressure creates a stronger jet pressure and a quick siphon action for better flushing performance. Performance without compromise.

**Pilot Operated Fill Valve**  
Quick, quiet and efficient. The M400 anti-siphon fill valve offers top performance with a guaranteed positive shut-off.

**Evenly Spaced Rim Holes**  
Precision drilled rim holes for a complete bowl wash every time.

Maverick Toilet  
Model 101-102
